

# Keshaav Gite

**Project Coordinator / PCO** · PMP · CSM · Cost Control · Resource Management · Executive Reporting

Toronto, ON · [keshavg0876@gmail.com](mailto:keshavg0876@gmail.com) · (437) 331-5861 · [LinkedIn](#) · [kg0876.github.io](https://kg0876.github.io)

## SUMMARY

PMP- and CSM-certified Project Coordinator, 4+ years keeping regulated, multi-million-dollar BFSI programs on schedule and on budget (S&P Global, MSCI, BNY Mellon). I forecast cost before it overruns, catch resource over-allocation before it slips deadlines, and report the truth early enough to act — fluent in MS Project, Dynamics 365, Power BI and Excel, and the governance that holds up under audit.

## WORK EXPERIENCE

### C2 Prep, Brampton, Canada — IT Project Coordinator

Oct 2025 – Jan 2026

- Cut issue-resolution time 20% (~10 → ~8 days) across 15+ concurrent requests by re-engineering the change-intake workflow — *faster throughput without adding headcount*.
- Surfaced 8–10 delivery risks per cycle and closed them ~1 week earlier via disciplined RAID tracking.
- Consolidated 4 fragmented trackers into one audit-ready repository, saving ~5 hrs/week of duplicate upkeep.

### S&P Global, Hyderabad, India — Research Analyst — Reporting & Governance

Mar 2022 – Dec 2022

- Consolidated 10+ workstreams on a \$3.2M program into one steering pack, cutting reporting turnaround ~30% — leadership got a reliable picture days sooner.
- Ran budget tracking and month-end, escalating variances 2–3 weeks before they hit the forecast — surprises became decisions the sponsor could still act on.
- Drove 60+ RAID items to closure, cutting the aging-risk backlog ~35%.
- Standardised the governance cadence across concurrent initiatives, keeping 10+ delivery leads aligned — fewer surprises reaching steering.

### SG Analytics (MSCI), Mumbai, India — Analyst — Project Controls & Reporting

Jan 2018 – Feb 2022

- Overhauled leadership dashboards on project health, financials and delivery risk, cutting manual reporting effort 40% across 6+ teams.
- Reconciled budget, forecast and cost variance to numbers delivery leads used without a re-check — accurate enough to decide on directly.
- Standardized reporting frameworks, trimming a further 20–30% of manual effort and ~2 days off each month-end close.
- Coordinated vendor-invoice review against deliverables and cost allocations, supporting an accurate month-end — financials leadership could close on with confidence.

## PORTFOLIO PROJECTS · [KG0876.GITHUB.IO](https://kg0876.github.io)

### Digital Banking Platform Upgrade — Cost Control (PCO) \$1.26M · OSFI B-13 · MS Project + D365 + Power BI

- Caught a \$31K forecast overrun that YTD spend reported as on-track — committed POs pushed EAC past budget; flagged a quarter early for a planned contingency drawdown, not an emergency.

### Resource Capacity & Project Operations (PCO) D365 Project Operations · 6 projects · 15-person bench

- Found a developer booked at 140% for 3 weeks that an 86% average had hidden — rebalanced to protect two fixed-price go-lives and prevent burnout.

## EDUCATION

**Algoma University** — Graduate Certificate, Project Management, Canada

May 2023 – Jan 2025

**Mumbai University** — MBA, India

May 2012 – Feb 2015

## CERTIFICATIONS & SKILLS

**Certifications:** [PMP \(Mar 2025\)](#) · [CSM \(Apr 2025\)](#) · [Discovering SAP Analysis for Microsoft Office \(Apr 2025\)](#)

**Cost & Delivery:** Budget vs Actual · EAC / Forecasting · Variance Analysis · Capacity Planning · Utilisation · RAID · Change Control · Steering Reporting · Stakeholder Management

**Tools:** MS Project · Dynamics 365 (Finance & Project Operations) · Power BI (Power Query, DAX) · Excel (Pivots, XLOOKUP, SUMIFS) · Jira · SharePoint · Power Automate

**Delivery:** Agile & Waterfall / Hybrid · SDLC · PMO Operations · BFSI / Regulated
